What is Epic Saaz?

Epic Saaz is a multi-tenant SaaS platform that gives entrepreneurs instant access to production-ready AI automations. Choose from a growing library of pre-built AI Blueprints covering lead generation, customer service, social media, email marketing, CRM sync, and more -- then activate in minutes.

- No code, no developers -- activate automations yourself
- A growing library of ready-to-use AI Blueprints across every business function
- Securely connect your own tools and API credentials
- Real-time execution monitoring and analytics dashboard
- Multi-user workspaces -- invite your team
- Month-to-month -- no long-term contracts

Team members	1	3	10	Unlimited
Execution history	7d	30d	90d	365d
BYOK (Bring Your Own Keys)	--	--	Yes	Yes
Priority support	--	--	Yes	Yes
SSO + Audit logs	--	--	--	Yes

How It Works

From sign-up to live automation in 3 simple steps.

1

Create Your Account

Sign up free. No credit card required. Your account is ready in under 60 seconds.

2

Choose an AI Blueprint

Browse a growing library of pre-built automations. Filter by category: lead gen, social media, email, CRM, customer service, and more.

3

Connect & Activate

Enter your API credentials (OpenAI, HubSpot, Gmail, etc.), review the workflow, and flip the switch. Your automation is live.

Blueprint Categories

- Lead Generation & CRM
- Social Media Management
- E-commerce Operations
- HR & Onboarding
- Email Marketing Automation
- Customer Service AI
- Data & Reporting
- Finance & Invoicing

Why Epic Saaz?

Built for non-technical founders

No code, no complex setup. Pick a Blueprint, connect your tools, and you are live in minutes.

AI credits included in every plan

Use OpenAI, Anthropic, Groq, and more with platform-managed keys. No separate API subscriptions needed.

Bring Your Own Keys (BYOK)

Already have API keys? Connect them directly and keep full control of your AI spend.

Real-time monitoring

Track every execution, see success rates, monitor AI credit usage, and catch errors instantly.

Team workspaces

Invite your team with role-based access. Admins, editors, and viewers -- each sees what they need.

Enterprise-grade security

AES-256-GCM credential encryption, row-level security, rate limiting, and audit logging.

Ready to automate your business?
